

MetaProducts Flash & Media Capture

Save images and Flash applets from the pages you browse!

Product Description

Flash & Media Capture provides you with a simple way to save images and Flash applets on your hard disk. It is a Windows plug-in application for MS Internet Explorer that adds a small toolbar allowing you to save all or selected media files from a page to the folder you want.

This tool is great for making collections of images on your disk from online photo albums, image forums and desktop wallpaper sites.

It also allows you to automatically save images and Flash applets to the folder you want. For example, you may browse a picture gallery and have all photos you see saved to a folder on your hard disk.

The program's dialog window displays all images and Flash files on the page so that you can preview and select the ones you wish to save.

MS Internet Explorer toolbar

The program adds a toolbar to MS Internet Explorer browser, including buttons to save images, Flash, autosave them and open the settings window.

AutoSave

If you want to save a series of images from various Web pages, you can setup Flash & Media Capture to place all the images you want into a folder on your disk. You can also specify the dimensions of the images to save and to skip automatically.

System requirements:

- Microsoft® Windows® 95, Windows 98, Windows 98 Second Edition, Windows Millennium Edition, Windows 2000, Windows NT® 4.0, Windows XP, Windows 2003 or Windows Vista
- 64MB of RAM, or the minimum memory required to run Windows
- 5Mb of available hard-disk space
